Graduate Employability Across Contexts Tran Le Huu Nghia, Binh Chi Bui, Jasvir Kaur Nachatar Singh, Vinh N. Lu, 2022-09-02 This book explores stakeholders' perspectives, their practices, and engagement with enacting the employability agenda in the context of a rapidly changing world. It explains the need for developing graduate employability under socioeconomic, cultural, and political pressure exposed to the higher education sector. Largely framed within Bourdieu's concepts of social field, habitus, and capital, it explores international stakeholders' perspectives and experiences with graduate employability agenda in different contexts, which serves as a point of reference for the adoption of such initiatives. Based on empirical evidence, the authors develop a new graduate employability framework seeing it as a lifelong

process, denote the relationships between types of employability capital, and shed light on the consequences of different strategies to translate employability capital to employment and career outcomes. Overall, this book generates both theoretical and practical insights which help to advance employability programs, better prepare the future workforce, and anticipate turbulence in the labour markets.

Higher Education, Public Good and Markets Jandhyala B. G. Tilak,2017-10-16 This book critically examines some of the major trends in the development of higher education. It demonstrates how in the context of liberalisation, globalisation and marketisation, the crisis in higher education has assumed different dimensions in all advanced and emerging societies. The author shows how the state tends to slowly withdraw from the responsibility of higher education, including in the arena of policy-making, or simply adopts a policy of laissez-faire (of non-involvement) which helps in the rapid unbridled growth of private sector in higher education. The notion of higher education as a public good is under serious contestation in current times. The book argues for the need to resurrect the compelling nature of higher education along with its several implications for public policy and planning, while providing a broad portrayal of global developments, comparative perspectives and key lessons. The volume will be of interest to scholars and researchers of education, political science, public policy and administration, governance, development studies, economics, and those working in the higher education sectors, think-tanks, policymakers as well as NGOs.
