John Bell, Claire Kilpatrick

Contemporary Challenges to International Business K. Ibeh, S. Davies, 2009-03-05 International business is synonymous with big challenges. Cultural and institutional complexities remain ever potent, so are 'newer' concerns like climate change and international terrorism. This timely book examines these challenges from the perspectives of different international business actors.

International Handbook of Health Literacy Okan, Orkan, Bauer, Ullrich, 2019-07-31 Available Open Access under CC-BY-NC licence. Health literacy addresses a range of social dimensions of health, including knowledge, navigation and communication, as well as individual and organizational skills for accessing, understanding, evaluating and using information. Particularly over the past decade, health literacy has globally become a major public health concern as an asset for promoting health, wellbeing and sustainable development. This comprehensive handbook provides an invaluable overview of current international thinking about health literacy, highlighting cutting edge research, policy and practice in the field. With a diverse team of contributors, the book addresses health literacy across the life-span and offers insights from different populations and settings. Providing a wide range of major findings, the book outlines current discourse in the field and examines necessary future dialogues and new perspectives.

Community-Based Transformational Learning Christian Winterbottom, Jody S. Nicholson, F. Dan Richard, 2020-05-14 Rooted in the work of community - school collaborations, this text focuses on connecting the rigors of the classroom with the ambiguity of lived community experience. Community-Based Transformational Learning (CBTL) draws on the increasing evidence that course-learning conducted in an applied, community setting, can positively transform students' professional and personal identity and creates new ways of thinking and working in university courses and pre-professional experiences. To illustrate the different ways to successfully implement community-based learning, examples are provided of experiences integrated in courses across multiple disciplines across an American university whose mission is focused on teaching. Topics covered include refugee and immigration transition issues, incarceration and health needs with international examples of community experiences from Jamaica, Korea and Belize. Qualitative and quantitative data depict how these experiences impact students and each chapter presents how community engagement has been established as an effective approach in the different disciplines, including computer science and sports management. The authors demonstrate how CBTL experiences

can be transformative when students are provided a chance to connect the academic commitment to community aims, but also provides suggestions for overcoming challenges and pit-falls in developing these experiences.

Business and Human Rights in Southeast Asia Mahdev Mohan, Cynthia Morel, 2014-09-25 Business and human rights has emerged as a distinct field within the corporate governance movement. The endorsement by the United Nations Human Rights Council of a new set of Guiding Principles for Business and Human Rights in 2011 reinforces the State's duty to protect against human rights abuses by third parties, including business; the corporate responsibility to respect human rights; and greater access by victims to effective remedy, both judicial and non-judicial. This book draws on the UN Guiding Principles and recent national plans of action, to provide an overview of relevant developments within the ASEAN region. Bridging theory and practice, the editors have positioned this book at the intersection of human rights risk and its regulation. Chapter authors discuss the implications of key case-studies undertaken across the region and various sectors, with a particular focus on extractive industries, the environment, and infrastructure projects. Topics covered include: due diligence and the role of audits; businesses' responsibilities to women and children; and the mitigation of human rights risks in the region's emerging markets. The book sheds light on how stakeholders currently approach business and human rights, and explores how the role of ASEAN States, and that of the institution itself, may be strengthened. In doing so, the book identifies critical challenges and opportunities that lie ahead for the region in relation to business and human rights. This book will be of excellent use and interest to scholars, practitioners and students of human rights, business and company law, international law, and corporate governance.

Epistemic Forces in International Law Jean d'Aspremont, 2015-02-27 Epistemic Forces in International Law examines the methodological choices of international lawyers through considering theories of statehood, sources, institutions and law-making. Journal of International Students, 2018(4) Krishna Bista, Chris Glass, The Journal of International Students (JIS), an academic, interdisciplinary, and peer-reviewed publication (Print ISSN 2162-3104 & Online ISSN 2166-3750), publishes scholarly peer reviewed articles on international students in tertiary education, secondary education, and other educational settings that make significant contributions to research, policy, and practice in the internationalization of higher education.

The Russian Economy and Foreign Direct Investment Kari Liuhto, Sergei Sutyryn, Jean-Marc F. Blanchard, 2016-11-10 Before the recent Ukrainian crisis, Russia was one of the main sources of foreign direct investment (FDI) outflow and one of the main targets of FDI inflow in the world. However, the events in the Ukraine, the formation of the Eurasian Economic Union, and China's growing interest in the Russian market and its natural resources have changed the picture completely. This new book brings together an international group of contributors to present a timely and comprehensive analysis of FDI to and from Russia. The book assesses the impact of the changed international political situation on foreign firms operating in Russia, and explores how the new world context has affected Russian investments abroad. The book also considers the future relationship between Russian corporations and the EU and the USA in light of recent events. This book answers an array of key questions including: how have investments from and to Russia developed in the last 100 years; how are Russian businesses spreading to foreign countries through their indirect investments; and how is the Russian Government influencing the investments of Russian businesses abroad? This volume is of great interest to those who study international economics, modern world economy, and FDI, as well as those interested in international investment movements and the changing role of Russia in international business and the global economy.

Handbook of Human Resource Management in Emerging Markets Frank Horwitz, Pawan Budhwar, 2015-02-27 The economic growth of emerging markets has been unparalleled in recent history, accounting for 50 per cent of global economic output. Cambridge Yearbook of European Legal Studies, Vol 7, 2004-2005 John Bell, Claire Kilpatrick, 2006-01-10 The Cambridge Yearbook of European Legal Studies provides a forum for the scrutiny of significant issues in European Union Law, the Law of the Council of Europe, and Comparative Law with a European dimension, and particularly those which have come to the fore during the year preceding publication. The contributions appearing in the collection are commissioned by the Centre for European Legal Studies (CELS) Cambridge, which is the research Centre of Cambridge University Law Faculty specialising in European legal issues. The papers presented are all at the cutting edge of the fields which they

address, and reflect the views of recognised experts drawn from the University world, legal practice, and the civil services of both the EU and its Member States. Inclusion of the comparative dimension brings a fresh perspective to the study of European law, and highlights the effects of globalisation of the law more generally, and the resulting cross fertilisation of norms and ideas that has occurred among previously sovereign and separate legal orders. The Cambridge Yearbook of European Legal Studies is an invaluable resource for those wishing to keep pace with legal developments in the fast moving world of European integration. International Student Adaptation to Academic Writing in Higher Education Ly Thi Tran, 2014-07-08 Academic writing is a key practice in higher education and central to international students' academic success in the country of education. International Student Adaptation to Academic Writing in Higher Education addresses the prominent forms of adaptation emerging from international students' journey to mediate between disciplinary practices, cultural norms and personal desires in meaning making. It introduces new concepts that present different patterns of international student adaptation including surface adaptation, committed adaptation, reverse adaptation and hybrid adaptation. Drawing on these concepts of adaptation, this book provides readers with new and deeper insights into the complex nature of international students' adjustment to host institutions. It works through many unresolved issues related to cross-border students' intellectual, cultural, linguistic and personal negotiations. This book presents a trans-disciplinary framework for conceptualising international students' and lecturers' practices within the institutional structure. This framework has been developed by drawing on a modified version of Lillis' heuristic of talk around text and positioning theory. The framework enables an exploration of not only the reasons underpinning international students' specific ways of meaning making, but also their potential choices in constructing knowledge. A distinctive contribution of the book is the development of a dialogical pedagogic model for mutual adaptation between international students and academics rather than the onus being on exclusive adaptation from the students. Existing research on international education indicates the significance of reciprocal adaptation between international students and academics. Yet very little has been done to conceptualise what mutual adaptation means and what is involved in this process. The dialogical model introduced in this book offers concrete steps towards developing reciprocal adaptation of international students and academics within the overarching institutional

realities of the university. It can be used as a tool to enhance the education of international students in this increasingly internationalised environment. This book is a significant contribution to the field of international education. It takes a critical stance on contemporary views of globally mobile students. The insights into international students' voices, hidden intentions and their potential choices in meaning making presented in this book will attract dialogues about the critical issues related to inclusive practices, internationalised curriculum and institutional responses to the diverse needs of international students.

Handbook of Research on Environmental Taxation Janet E. Milne, Mikael Skou Andersen, 2012-01-01
 Ingeniously organized in a life cycle format, the Handbook covers environmental taxation concepts, design, acceptance, implementation, and impact. The universal themes discussed in each area will appeal to a broad range of readers.
 Larry Kreiser, Cleveland State University, US
 This book is a smart and useful reader's guide providing analytical tools for a full comprehension of environmental taxes, with an interdisciplinary approach that looks at all the different phases of environmental taxation: from the design to the implementation, the political acceptance and the impact on the economy. The authors' effort is very successful in endowing academicians, policy makers and the general public with an excellent proof of the effectiveness of environmental taxes and green tax reforms.
 Alberto Majocchi, University of Pavia, Italy
 Putting the words 'environment' next to 'taxation' might not always be the flavour of the month, but no modern society can ignore the value of the natural environment and the need to maintain its good quality and no competitive economy can prosper without the necessary tax revenues to function. Environmental taxation offers the prospect of moving towards a more resource-efficient economy, where preference is given to tax more what we burn, less what we earn. I welcome this contribution to the literature.
 Commissioner Connie Hedegaard, European Commission
 The Milne and Andersen volume provides a splendid treatment of environmental taxation that encompasses the basic conceptual issues, problems of tax design and implementation, and several insightful case studies that show how environmental taxes actually work in practice. It is the best overall treatment of environmental taxation available: comprehensive, rigorous, and readable.
 Wallace Oates, University of Maryland, US
 The Handbook of Research on Environmental Taxation captures the state of the art of research on environmental taxation. Written by 36 specialists in environmental taxation from 16 countries, it takes an interdisciplinary and international approach, focusing on issues that are universal to using taxation to achieve environmental goals. The Handbook explores the conceptual foundations of environmental taxation, essential elements for designing environmental tax measures, factors that influence the acceptance of environmental taxation, the variety of ways to implement environmental taxes, their environmental and economic impact and, finally, the larger question of the role of

taxation among other policy approaches to environmental protection. Intermixing theory with case studies, the Handbook offers readers lessons that can be applied around the world. It identifies key bodies of research for people who are already working in the field or entering the field and highlights issues that call for more research in the future. With systematic analysis of key issues in environmental taxation, this book will appeal to researchers, governments, think tanks, NGOs, and academics in law, economics, political science and public finance, as well as students specializing in environmental taxation and other market-based instruments.
