Parallel Societies of International Students in Australia Catherine Gomes,2021-09-30 *Parallel Societies of International Students in Australia* explores the social and cultural spaces that international students occupy in destination countries. It specifically examines the connections they make and the significance of this parallel society in helping them become resilient, empowered and self-sufficient. It further explores the way in which international students become disconnected from the family and friends they left behind at home, as well as from local communities. Drawing on a decade worth of research into the social, cultural, real and digital spaces occupied by international students in Australia, the book also reflects on the biggest challenge humanity has faced in a hundred years; the COVID-19 global pandemic. It considers the impact that the decisions made by the Australian government and international education stakeholders in response to this evolving crisis have had on international students. This book will be of interest to academics and stakeholders involved in international education and working with international students.

ITF Research Reports Liberalisation of Air Transport International Transport Forum,2019-05-03 Aviation is one of the most regulated industries in the world. Much of this regulation is safety-related, to mitigate the inherent risks tied with air transport. But aviation is also subject to economic regulation that influences which airline flies which route, at which frequency, capacity and price. It even stipulates the nationality of its owners and decision makers. Aviation has freed itself from some restrictions over the past three decades, with many benefits to society. Yet liberalisation has also raised issues with regard to maintaining fair competition, high labour standards and mitigating aviation's growing environmental impact.

From Asian to Global Financial Crisis Andrew Sheng,2009-05-16 This is a unique insider account of the new world of unfettered finance. The author, an Asian regulator, examines how old mindsets, market fundamentalism, loose monetary policy, carry trade, lax supervision, greed, cronyism, and financial engineering caused both the Asian crisis of the late 1990s and the global crisis of 2008-9. This book shows how the Japanese zero interest rate policy to fight deflation helped create the carry trade that generated bubbles in Asia whose effects brought Asian economies down. The study's main purpose is to demonstrate that global finance is so interlinked and interactive that our current tools and institutional structure to deal with critical episodes are completely outdated. The book explains how current financial policies and regulation failed to deal with a global bubble and makes recommendations on what must change.
