The Power of Accounting Lawrence D. Lewis, 2012-01-16 The Power of Accounting: What the Numbers Mean and How to Use Them provides a highly readable text for non-financial managers. It explores accounting's uses and limitations in the management process. The text is intended for users of accounting information as opposed to preparers. It focuses on aiding the reader in understanding what accounting numbers mean, what they do not mean, when and how they can be used for decision making and planning and when they cannot. The book discusses the importance of accounting information in the economy and the fact that accounting numbers are often the result of estimates and arbitrary allocations. It also includes a cautionary word about the imprecise use of terminology often found in accounting and financial literature.

Financial Statement Analysis and the Prediction of Financial Distress William H. Beaver, Maria Correia, Maureen McNichols, 2011 Financial Statement Analysis and the Prediction of Financial Distress discusses the evolution of three main streams within the financial distress prediction literature: the set of dependent and explanatory variables used, the statistical methods of estimation, and the modeling of financial distress. Section 1 discusses concepts of financial distress. Section 2 discusses theories regarding the use of financial ratios as predictors of financial distress. Section 3 contains a brief review of the literature. Section 4 discusses the use of market price-based models of financial distress. Section 5 develops the statistical methods for empirical estimation of the probability of financial distress. Section 6 discusses the major empirical findings with respect to prediction of financial distress. Section 7 briefly summarizes some of the more relevant literature with respect to bond ratings. Section 8 presents some suggestions for future research and Section 9 presents concluding remarks.

Trends in managerial and financial accounting Cees van Dam, 2012-12-06 In August, 1976 the research seminar 'Decision-making in business' was organized at Nijenrode, The Netherlands School of Business. More than fifty scientists and practitioners from nine countries presented research papers in one of the six discussion groups. Some of them also presented some of their ideas in front of a large mixed audience at a one-day symposium. Many of the papers presented at Nijenrode were of such a high quality that the decision to publish a selection of them was an easy one. At the same time the new series Nijenrode studies in business was initiated. All who were involved, the policy committee of the N ijenrode studies, the advisory and editorial board of the series, the publisher, and the organizing committee of the seminar and symposium, acclaimed the idea of publishing three volumes in the new series. A collection of eleven papers could be grouped under the title Trends in managerial and financial accounting. Another collection will be published as volume 2 of this series under the title Trends in financial decision-making, while volume 3 will consist of papers exploring the theme Trends in business ethics. The books are intended for those who are interested in new developments in the decision-making area. They are especially suitable for graduate or advanced undergraduate courses: volume 1 in managerial or financial accounting courses; volume 2 in courses on managerial finance, capital budgeting or decision making; and volume 3 in courses on business ethics or related fields.
