How To Be An Effective Supervisor: Best Practice In Research Student Supervision Eley, Adrian, Murray, Rowena, 2009-05-01 This is a practical guide aimed at supervisors of research students. It is written in a lively case study style and is designed to appeal to supervisors who need a quick fix, and who have neither the time nor the inclination to read a more detailed, in depth book on the subject such as *Supervising the Doctorate*. There is a growing need for such a volume as the QAA postgraduate code of practice in the UK indicates that all new doctoral supervisors must be trained appropriately. This book will be very suitable for such training courses. The authors both come from a medical background so the book is likely to be particularly well recieved within scientfic and medical departments.

The Lean PhD Julian Kirchherr, 2018-05-18 This book fundamentally challenges the way in which PhDs are currently

pursued. It applies lean methodologies - which have been embraced by start-ups - to the doctoral research process. It explains how to apply techniques such as the minimal viable product (MVP) approach, rapid prototyping and pivoting to each stage, from choosing a topic to seeking feedback, in order to save time, make the process more efficient and demonstrate impact. Chapters are enriched with insights from PhD researchers, practical guidance on going lean and a wealth of empirical data which supports this new approach to postgraduate research. This inspiring text is a must-read for prospective and current PhD students who wish to accelerate their careers in academia and beyond.

Teaching and Research Methods for Islamic Economics and Finance Mohd Ma'Sum Billah,2022-03-10 Methods and techniques adopted in teaching, training, learning, research, professional development, or capacity building are generally standardized across most traditional disciplines, particularly within developing countries. This is not the case, however, when it comes to the Islamic disciplines, and, in particular, in relation to the study of Islamic economics and finance, which is influenced by conventional standards and techniques. This is primarily due to the lack of availability of the requisite standards and mechanisms designed within the spirit of Maqsid al-Shari'ah. This book offers a unique resource and a comprehensive overview of the contemporary methods and smart techniques available for teaching, learning, and researching Islamic eco-finance, and it presents solutions to the challenges in implementing them. Further, the book gives deep insight into the most appropriate methodologies that could be employed empirically to explore, model, analyze, and evaluate Islamic finance theories and models, respectively. It also gives recommendations for improving learning, teaching, and research outcomes in Islamic eco-finance. The book also addresses how, in this advanced technological era, smart tools like artificial intelligence, machine learning, big data, Zoom, and the internet of things can be adapted to help equip students, researchers, and scholars with smart skills. The book will enable those studying Islamic economics and finance to grasp the appropriate tools for research and learning. Additionally, the Islamic economics and finance sector is growing at a significant rate and therefore requires the upskilling and capacity building of its human resources; thus, the book will also be highly beneficial for practitioners involved in the industry.
