Towards Sustainable and Inclusive Higher Education Challenges and Strategies (Penerbit USM) Melissa Ng Lee Yen Abdullah, Ahmad Nurulazam Md. Zain, 2016-05-30 In building sufficient, efficient human resources, massification of higher education is a common phenomenon. It is to this end that sustainability and inclusiveness have become such critical issues in higher education and its literature. This book looks into the major question of financial sustainability for the higher education institution, revealing the university's struggles in the face of limited public funds. Coping strategies and feasible alternatives are extensively examined. The authors also tackle the area of higher education systems and collaboration in ensuring sustainability. Here, matters such as the public-private equilibrium, sustainable alumni networks, and research and publication competitiveness are deliberated. One distinguishing feature of this publication, however, is its discourse on higher education access, giving unique insight into the plight of certain underrepresented groups in higher education. The writers champion inclusiveness by analysing and recommending the best practices in bolstering these marginalised factions towards academic success. Workforce Development and Skill Formation in Asia John Benson, Howard Gospel, Ying Zhu, 2013-05-29 Asia has undergone rapid transformation over the past several decades as many countries have embraced new technologies and the processes of globalisation. Over this period the inflow of foreign capital into the region, the level of trade amongst these countries, and trade with other parts of the world has increased substantially. The ensuing economic growth has led to some significant changes in labour markets and the demand for skilled employees and their deployment within organisations. Focusing on a number of developed and developing Asian economies, this book explores the dynamics of workforce

development and skill formation, and considers questions of both skills shortages and skills gaps. The book assesses the current state of training in the selected Asian economies, the weaknesses and strengths of their various training approaches, and what the present state of training means for the future economic development of these economies.

*Case Studies in Management and Business (Volume 2) (UUM Press)* Rosliza Mat Zin, 2015-01-01 Institute for Business and Management Research (IMBRe), Universiti Utara Malaysia, is pleased to extend this book which features a compilation of business management case studies. The aims of this second volume of Case Studies in Management and Business remain unchanged from the first volume. Realizing the importance of using case study as one of the student-centered learning approach, this book is designed to enhance learning and teaching activities by providing a collection of teaching cases which could be used both for the undergraduate and postgraduate levels. This book includes relatively wide scope of work includes marketing, business policy, IT and Islamic finance. However the field is still in the field of management in general. The target audience is an academician and management students. In general, this book meets the scope of management. It is also suitable for an academician and students, but may not be appropriate in using for certain course, because of its scope is geared to specific disciplines. This book has the potential, especially if the university lecturers took it to be discussed in their classes. There is least amount of case use Malaysia environment in the market. The cases highlighted also are unique and not similar to the other cases. Furthermore, this book is using a real case in the beginning, especially in our country. In addition, this book is accompanied by teaching notes for each case. These teaching notes are available to instructors only. First to fifth case is ongoing for all cases involving the issue of whether the marketing or the service industry. The second and third cases

**Higher Education Finance and Islamic Endowments** Nurul Adilah Hasbullah, Asmak Ab Rahman, 2023-11-09 Public debt pressures due to the global economic crisis in several countries have impacted higher education, compelling governments to curtail the funding of higher education institutions (HEIs). Various instruments have been proposed as a platform for the private sector to channel funding to HEIs. This book introduces readers to the issues surrounding the financing of HEIs, especially public universities, which are dependent on government budgets. It discusses the sources of funding for HEIs, focusing on philanthropic instruments through endowment and waqf funds. Since both forms of income are obtained via contributions from third parties, such as alumni, individuals, business corporations etc., it is essential that they are managed in such a way to ensure their sustainability and that their benefits can be accessed without interruption. It explains the theory of successful endowment and waqf at HEIs, namely appropriate investment planning, superior investment committees, highly skilled investment managers, alumni networks, diversity of income sources and effective fundraising. These elements have been studied empirically in this book through case studies of several selected Malaysian public universities. The book considers policy implications and offers recommendations of strategies that Universities can adopt, such as the appointment of fund managers. No specific guidelines currently exist for appointing fund managers to enable universities to invest in assets such as bonds, equities, and property. Therefore, the book encourages universities to grow the endowment and waqf funds through proper investment strategies executed by professional fund managers. The book contributes new knowledge to scholars, students and researchers, as well as informing university administrators how to collect, manage and invest funds from endowment and waqf.
