Leadership Training in University-Community Engagement (Penerbit USM) See Ching Mey, 2016-06-13 Module I provides an overview on university-community engagement (UCE). It explains how universities disseminate the concept of community engagement to the wider world. The different categories and levels of community engagement are elaborated in this module. UCE frameworks are discussed to provide general overview of how higher education institutions (HEIs) can adapt in their effort to transform communities. Module II explains the why of implementing community engagement in HEIs. The topics covered include the rationale for HEIs to adopt community engagement as a part of their agenda; the model framework and role of volunteerism in community engagement; and leadership development in community engagement. To ensure that the stakeholders in the ecosystem of the nation accept community engagement as an important part of education, the benefits of community engagement to everyone and the nation are discussed. Module III focuses on the implementation of UCE. The process flow of UCE is introduced at the beginning of the module. It covers three major phases: (i) initiation of community engagement plan, (ii) design and implementation of community engagement, and (iii) evaluation and reporting of community engagement. The workshop modules will engage all HEIs to review, understand and implement best practices in UCE activities/projects to benefit various thrust areas. It can also bridge various stakeholders including MOHE, MOE, AKEPT, IPPTN and APUCEN. Thus, it is crucial for everyone to join force in establishing a national framework and best practices for the country to provide a systematic, sustainable, engaging and inclusive approach for community engagement. New Trends in Software Methodologies, Tools and Techniques A. Selamat,H. Fujita,H. Haron,2014-08-29 Software is the essential enabling means for science and the new economy. It helps us to create a more reliable, flexible and robust society. But software often falls short of our expectations. Current methodologies, tools, and techniques remain expensive and are not yet sufficiently reliable, while many promising approaches have proved to be no more than case-by-case oriented methods. This book contains extensively reviewed papers from the thirteenth International Conference on New Trends in software Methodology, Tools and Techniques (SoMeT_14), held in Langkawi, Malaysia, in September 2014. The conference provides an opportunity for scholars from the international research community to discuss and share research experiences of new software methodologies and techniques, and the contributions presented here address issues ranging from research practices and techniques and methodologies to proposing and reporting solutions for global world business. The emphasis has been on human-centric software methodologies, end-user development techniques and emotional reasoning, for an optimally harmonized performance between the design tool and the user. Topics covered include the handling of cognitive issues in software development to adapt it to the user's mental state and intelligent software design in software utilizing new aspects on conceptual ontology and semantics reflected on knowledge base system models. This book provides an opportunity for the software science community to show where we are today and where the future may take us.

Machine Learning Methods for Signal, Image and Speech Processing M.A. Jabbar, MVV Prasad Kantipudi, Sheng-Lung Peng, Mamun Bin Ibne Reaz, Ana Maria Madureira, 2022-09-01 The signal processing (SP) landscape has been enriched by recent advances in artificial intelligence (AI) and machine learning (ML), yielding new tools for signal estimation, classification, prediction, and manipulation. Layered signal representations, nonlinear function approximation and nonlinear signal prediction are now feasible at very large scale in both dimensionality and data size. These are leading to significant performance gains in a variety of long-standing problem domains like speech and Image analysis. As well as providing the ability to construct new classes of nonlinear functions (e.g., fusion, nonlinear filtering). This book will help academics, researchers, developers, graduate and undergraduate students to comprehend complex SP data across a wide range of topical application areas such as social multimedia data collected from social media networks, medical imaging data, data from Covid tests etc. This book focuses on AI utilization in the speech, image, communications and virtual reality domains.
